HEALTHY AGING 🏵 WINTER 2022 2022.1.3 - 20<u>22.1.22</u> HKSTP - HKUST ISD - HKU INNO%/ING

PROJECT CATALUGG

Welcome to InnoX Winter 2022 Expo

InnoX Winter Camp is a project-based hands-on entrepreneurship bootcamp jointly hosted by HKUST, HKU and HKSTP. The 3-week intensive bootcamp saw the 32 young entrepreneurs from 3 universities through a human-centered and agile product design journey.

With this innovation and entrepreneurship program, we demonstrate the global-vision and the make-it-happen mindset of the dedicated students working together towards an inclusive society. In supporting the students' ambition, the camp design included tours, guest speakers, advising sessions, pitching opportunities. From design thinking (developing deep insights into market and customers' needs), to engineering design (systematically applying enabling technology), to systems thinking (building commercially viable product concepts while creating values to the customers), the program was condensed and comprehensive. The 6 multidisciplinary teams have risen to the challenge of finding real-world problems, ideating creative solutions and prototyping innovative products in the thematic focus of healthy ageing.

We would like to thank our partners who shared the InnoX vision, for offering their time, resources and expertise. Your teaching, insights and advices inspire the students at the different stages of this exciting yet rewarding experience.

We, the teaching team, are proud of what the teams have achieved within such short time. We are looking forward to continue in mentoring and supporting on their entrepreneurial venture into the future.

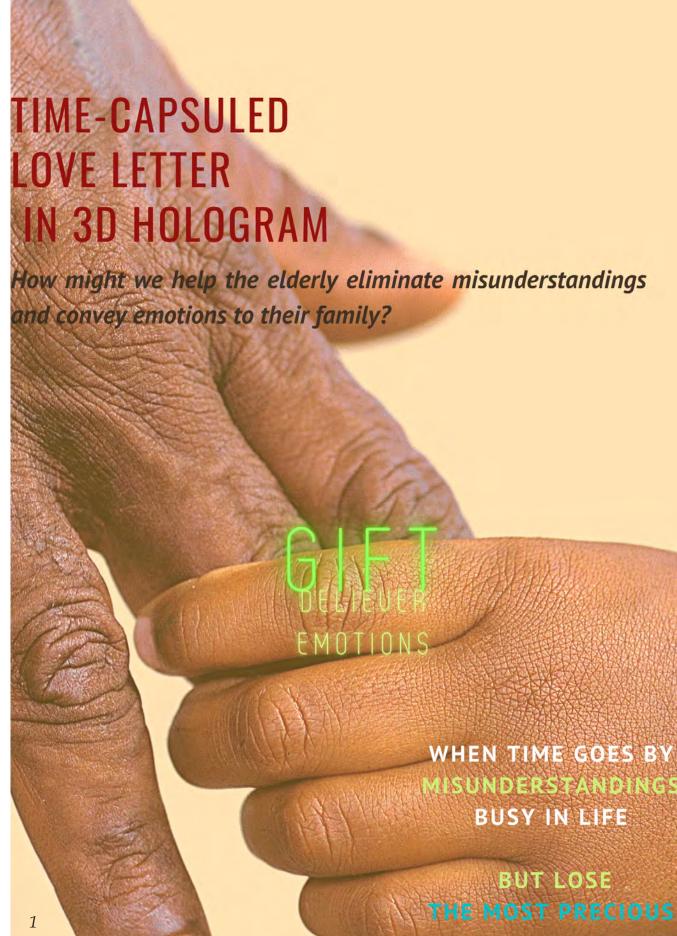

Congratulations to InnoX Winter 2022 Cohort!

Com Joseph.

TIME-CAPSULED LOVE LETTERS

A gift-making platform based on holographic projection, 3D model, vision control, and voice recognition.

Deliver emotions through gifts

[Beak down the psychological barrier in different generations]

Making a gift /receiving a blessing

[A powerful the elderly in their fight against loneliness]

MAKING A SPECIAL GIFT

SENT TO YOUR LOVER

AS FOR YOURLOVERS

Do you have something you are shy to tell them?

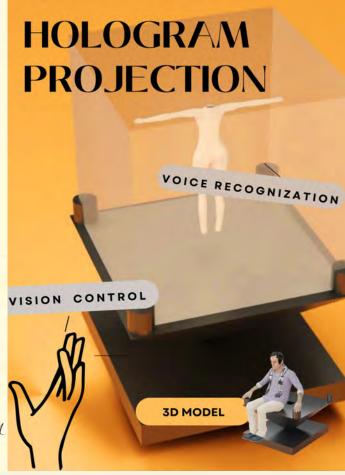

Do you want to always be with them even far away?

Do you want to make surprise in your daily life like Easter Eggs?

HOLOGRAM

CREATE YOUR OWN STYLEBACTIONS

A LOVE LETTER

Prepare a small surprise for others through timed emails. APP, projection side can easily customize a gift.

.(Corresponding to the voice prompt of the holographic projection for the edrly).

When people start customizing, they can design a gift and set the recipient to receive it at any point in time.

The time span of gift can be a year or even more.

Cifts can be in the form of VIDEO, holographic projections or a treasure hunt at home, new custom gifts received, etc.

Surprising gift:Randomly in 2025 Weekly Tasks:Get a small gift if Bob do exercise Birthday & New Year gift

CREATE YOUR OWN STYLE, GIFT AND COMPANY
WITH YOUR FAMILY MEMBERS

"INFINITY AND BEYOND" DORA

SOCIAL ROBOT TOWARDS ENRICHING & FOSTERING COMPANIONSHIP

Problem Statement

To solve the problem of loneliness and depression in older adults by making them feel loved and motivated.

Problem

Due to lack of social company, surgical interventions and physical disorders, elderly people often suffer from mental health issues such as isolation, depression

Developing an Interactive robot for elderly with mental health issues such as depression and loneliness to assist them in the process of Doll Therapy by using the increased and embracing IT technology in caring sector.

Benefits

- Decreasing boredom which can reduce the appearance of agitation and wandering.
- · Providing a sense of belonging and purpose
- and helping to maintain mobility and social skills.
- An outlet to talk about feelings and experiences with the doll and a source of giving and receiving unconditional love.
- Enabling a sense of comfort and security and increasing social interaction, connection and engagement with others

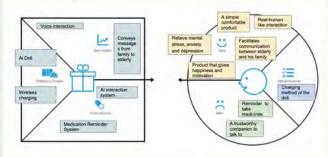

Customers

We aim to target elderly people suffering from mental health issues. Number of elderly above the age of 65 is approximately 703 million (United Nations, 2019). Further, according to World Health Organisation 1 out of every 4 elderly suffers from mental disorder. Therefore, an approximate consumer base of more than 175 million across the globe, which further continues to grow due to pandmeic.

Our **technology** can transform current healthcare to be precisely adapted to each individual with unique profiles. Through sensitive monitoring and enhanced treatment for different health problems, we empower everyone to experience enriched quality of life.

703M

people with age 65 or above in 2019

people with age 65 or above in 2050

~36.1%

prevalence of urinary incontinence in world population

Target Users

Older adults (with mobility) undergoing Eneresis

Sensors

Through non-invasive ultrasound sensors, we accurately monitor the state of the user's bladder using machine learning.

Urine test

Urinalysis is a common test used to access many different aspects of people's health with a urine sample. Biomarker analysis technology will guide elderly to make enhanced diet decisions in the future.

Integrated Urine Collection System

Our product collects the elderly's urine leakage (from urinary incontinence) with a biocompatible and user-friendly urine collection system.

Fashionable

iPants enable you to expand your wardrobes & add taste in your fashion with ease and dignity

Smart

Through decentralized IoT Health Care, iPants monitor your health and predict your urinary pattern.

Comfortable

iPants allow you to spend a day without any discomfort.

meet Maia

Your mental health assistant.

Maia lives inside The Shell.

It is a small necklace, so Maia can be with you anywhere. She is ready to listen - one tap, and a record starts for 15 seconds.

You may answer the questions from Maia or just tell anything you feel she should know to understand you better.

Lasting battery, data privacy, safe strap, magnetic charging, hue illumination, loud speaker, taptic feedback, app connectivity.

All in a pretty Shell.

Pure science.

Maia can ask you questions, listen to the answers, and see more than you expect. It is like having a certified therapist, counsellor, and a friend who is ready to help in your pocket, but better.

Maia analyses the characteristics nature of your voice in different situations to give oneof-a-kind suggestions through the app.

From phrases pace volume pitch

To longer lifespan better memory quality mood consciousness tone stress relief

Seamless use.

1. Setup

2. Talk

3. Get the insights

Perfect for older adults.

Continuous mood tracking is especially important for older adults.

Knowing the dynamics of its changes, we can prevent the development of age-related issues, loneliness, and depression.

We build Maia.

The importance of mental health is underestimated nowadays.

We are here to build a solution for tracking it better. We are here to make healing depression, loneliness, and age-related conditions easier.
